PROFESSIONAL SUMMARY

Computer Science & Engineering graduate with hands-on experience in Data Analytics, Machine Learning, Python, SQL, Power BI, and Software Development. Developed AI-powered applications, analytical dashboards, and full-stack solutions through academic projects and internships. Published research author with strong analytical, problem-solving, and data-driven decision-making skills.

SKILLS

Programming Languages: Python, SQL, Kotlin, JavaScript(Basic)
Data Analytics & Visualization: Power BI, Excel, Data Analysis, Data Cleaning, Data Visualization
Databases: MySQL, Firebase
Machine Learning: Scikit-learn, NLP, Classification Models, Feature Engineering, Model Evaluation
Development Tools: Git, GitHub, Firebase
Web & API Technologies: REST APIs, JSON

EXPERIENCE

Cognifyz Technologies | *Data Science Intern (Remote)* **Jul 2024 - Aug 2024**

- Collected, cleaned, and transformed structured datasets to improve data quality and support machine learning and analytics workflows.
- Performed exploratory data analysis on multiple datasets to identify trends, patterns, and actionable insights for decision-making.
- Created analytical reports and documentation summarizing findings, methodologies, and business recommendations.
- Assisted in data preprocessing, feature preparation, and validation activities for predictive modeling tasks.

PROJECTS

AI Loan Decision Dashboard | *Power BI* | *Python* | *SQL* | GitHub

- Built interactive Power BI dashboards integrating Python and SQL workflows to analyze loan approval trends, customer risk profiles, and lending KPIs.
- Performed data cleaning, transformation, and visualization to identify approval trends and customer risk patterns.
- Generated business insights through KPI tracking, predictive analysis, and data-driven reporting.

Fake News Detection System | *Python* | *Machine Learning* | *NLP* | *Flask* | GitHub

- Designed and deployed a Machine Learning and NLP-based news classification system using Python and Flask.
- Applied text preprocessing, feature extraction, and classification algorithms for misinformation detection.
- Achieve approximately ∼**90%** prediction accuracy on test datasets.

CabEase – Cab Aggregator Platform | *Kotlin* | *Firebase* | *REST APIs* | GitHub

- Developed a full-stack cab booking application using Kotlin and Firebase.
- Implemented user authentication, ride booking workflows, real-time database integration, and backend services.
- Focused on improving booking efficiency and user experience through scalable application design.

RESEARCH PUBLICATION

Safe Rides, Fair Prices: A Comprehensive Analysis of India's Ride-Hailing Sector
International Journal of Scientific Research in Computer Science and Engineering (IJSRCSE)

- Conducted research on fare transparency, pricing strategies, customer satisfaction, and ride-hailing platform challenges.
- Proposed technology-driven solutions to improve transparency and user trust in urban mobility systems.

EDUCATION

Dr. A.P.J Abdul Kalam Technical University **2021 – 2025**
B.Tech in Computer Science & Engineering *CGPA: 7.34*

CERTIFICATIONS

HackerRank — Advanced SQL
IBM — Data Science & Machine Learning Fundamentals
GrowthSchool – Generative AI Bootcamp (LLMs, Prompt Engineering, Workflows)

ACHIEVEMENTS & PUBLICATIONS

- Published Research Author in IJSRCSE.
- Developed multiple end-to-end software and analytics projects.
- Strong academic and practical exposure to Data Analytics, Machine Learning, and Software Development
