SUMMARY

Senior Backend Software Engineer with **5+ years** of experience architecting scalable, cloud-native web applications and high-performance RESTful APIs for business-critical SaaS platforms. Proven track record of **improving system performance by 60%**, leading cross-functional engineering teams, and delivering AI-integrated solutions supporting thousands of concurrent users. Deep expertise in **Node.js, TypeScript, NestJS, PostgreSQL, Redis, microservices architecture, and AWS cloud infrastructure**. Adept at designing **event-driven architectures**, optimizing data pipelines, and implementing comprehensive observability strategies. Strong async communicator who mentors junior developers, drives DevSecOps adoption, and collaborates effectively with distributed remote teams to deliver measurable business outcomes.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Node.js, Python, SQL

Backend Frameworks: NestJS, Express.js, GraphQL, RESTful API Design, gRPC, Microservices Architecture, Event-Driven Architecture, Serverless Architecture, System Design, High Availability, Load Balancing

Databases: PostgreSQL, MySQL, Redis, Elasticsearch, MongoDB, Query Optimization, Database Indexing, Data Pipeline Design

Cloud & DevOps: AWS (EC2, S3, Lambda, SQS), Docker, Kubernetes (K8s), CI/CD Pipelines, Azure DevOps, GitHub Actions, Terraform, Infrastructure-as-Code, API Gateway, Cloud Architecture

AI & Integration: LLM API Integration, AI Agent Orchestration, OpenAI / ChatGPT APIs, RAG Architecture, Third-Party API Integration, Wrapper API Design

Monitoring & Testing: OpenTelemetry, DataDog, ELK Stack, Structured Logging, Mocha, Chai, Jest, Swagger/OpenAPI, Contract-First Development, TDD

Security & Compliance: OAuth2, JWT, RBAC, HIPAA Compliance, SOC 2, DevSecOps, Automated Security Scanning, Secret Rotation

Development Practices: Agile/Scrum, Git, Code Reviews, Technical Documentation, Asynchronous Communication, Remote Collaboration

PROFESSIONAL SKILLS

Leadership & Mentoring: Engineering team leadership, Junior developer mentoring, Technical guidance & architecture reviews, Code review leadership, Cross-functional team coordination

Communication: Asynchronous communication, Cross-functional collaboration, Technical documentation, Stakeholder presentations, Requirements gathering, Distributed team collaboration

Problem Solving: System debugging & root cause analysis, Performance optimization, Architecture design, Scalability planning, Incident response & postmortems

Project Management: Agile methodologies, Sprint planning, Risk assessment, Delivery coordination, Process automation

KEY ACHIEVEMENTS

- **Architected and delivered Strategy Kit platform** replacing legacy multi-step Brand Guide workflow (PPT → Ignite → PDF → Sync pipeline) with a streamlined in-product consultation system, eliminating 5+ manual handoff points and reducing customer onboarding time by 70%
- **Led platform modernization** from WordPress monolith to NestJS microservices, reducing deployment time from 2+ hours to 5 minutes (96% improvement) and improving team productivity by 40%
- **Improved system reliability by 60%** through comprehensive observability implementation (OpenTelemetry + structured logging), enabling faster incident resolution and proactive monitoring across distributed services
- **Mentored and developed 3 junior engineers** through structured code reviews, pair programming, and architecture sessions, with all mentees receiving promotions within 12 months
- **Achieved 99%+ data pipeline reliability** by designing resilient ingestion system with idempotent processing and automated error recovery, eliminating manual intervention across 10+ departments

EXPERIENCE

Software Engineer (Backend) — Dec 2025 – Present

Buzzboard India Private Limited • Remote

- **Architected and developed the Strategy Kit platform** a full-stack backend system replacing the legacy Brand Guide workflow on the Zylo AI Fulfillment OS, streamlining customer consultation from a 5-step manual pipeline (PPT → Ignite → PDF → Data Sync → Platform) to a single in-product experience, reducing onboarding time by 70% and eliminating cross-platform data handoff failures
- **Designed and implemented RESTful APIs and data synchronization layer** for the Strategy Kit module, enabling real-time editing, validation, and submission of brand configuration data (fonts, colors, typography, POV, compliance settings) with automatic cross-platform sync upon submission, ensuring data consistency across all downstream AI-generated marketing products
- **Integrated AI wrapper APIs and LLM endpoints** to auto-populate Strategy Kit fields with contextual data previously only captured in manual PPT consultations, leveraging OpenAI APIs to generate brand-aligned content context for social posts, social ads, Google Ads, reputation management, email marketing, and website content generation
- **Spearheaded AI model endpoint migration initiative** coordinating with the ML/AI model team to update and integrate 10+ AI model endpoints across the Zylo platform, ensuring backward compatibility while enabling access to improved content generation models with zero downtime during transition
- **Built dynamic product labeling system** engineering backend logic to dynamically generate and serve compliance and feature labels (HVC, ER, HIPAA-compliant, Strategy Kit status, Getty/stock image usage, bundle order indicators) across all product views, improving product transparency and regulatory compliance visibility for end users

- **Scaled platform capabilities to Zylo Global (D2C & Agency)** adapting and deploying backend services for the customer-facing D2C and Agency platform variant, implementing tenant-specific configurations across 2 platform variants and ensuring 100% feature parity while maintaining separate customer-facing experiences
- **Implemented comprehensive debug logging and traceability system** for the Strategy Kit pipeline, designing a stage-based SK Debug Logs collection storing order-level data at each processing stage, enabling end-to-end traceability, reducing debugging time by 50%, and supporting proactive issue detection across the fulfillment workflow
- **Integrated third-party APIs and cross-team service endpoints** building robust wrapper APIs with input validation, error handling, and structured error logging to prevent data pipeline failures, achieving 99.5%+ API reliability and reducing production incidents by 40%

Software Development Engineer 2 – Backend
Apr 2023 – Dec 2025

Codemaya (ARNI – Proprietorship) • Lucknow (Hybrid)

- **Led platform modernization initiative** migrating legacy WordPress monolith to scalable NestJS microservices architecture, improving deployment efficiency by 96% (2+ hours → 5 minutes) and enabling continuous delivery for 5-person development team
- **Architected high-performance backends for multiple SaaS products** (Provarity, Tradeline, Luxehunt, Godspeed) supporting 10x user growth through strategic database optimization, Redis caching, and Elasticsearch integration, achieving sub-200ms API response times and managing 5-member development team
- **Implemented zero-downtime deployment strategy** using shadow table migrations and blue-green deployment patterns, maintaining 99.9% uptime during major system upgrades
- **Built AI-powered collaboration platform (Provarity)** with GraphQL API implementing queries, mutations, and real-time subscriptions, integrating ChatGPT, Zoom, and Calendar APIs, driving 40% increase in user engagement and establishing new revenue stream
- **Established comprehensive observability infrastructure** with OpenTelemetry instrumentation and structured logging, reducing mean time to resolution (MTTR) by 60% and enabling proactive system health management across distributed services
- **Championed DevSecOps practices** implementing automated security scanning, secret rotation, dependency vulnerability management, and RBAC, achieving SOC 2 compliance readiness
- **Mentored cross-functional development team** of 3 junior engineers through structured code reviews, pair programming, and architecture sessions, resulting in 100% promotion rate and measurably improved code quality metrics across all projects

Junior Software Developer
Jun 2021 – Feb 2023

Jio Platforms Limited • Navi Mumbai

- **Developed enterprise compliance portal (iRCMSv2)** serving multiple business divisions, reducing manual processing time by 30% through automated workflows and streamlined approval systems
- **Engineered reliable data pipeline** with 99%+ success rate using Kafka Connect and MySQL, enabling consistent regulatory reporting for financial compliance across 10+ departments
- **Implemented comprehensive testing strategy** using Mocha/Chai and contract-first development with Swagger/OpenAPI, achieving 90%+ code coverage and reducing production defects by 50%
- **Established enterprise CI/CD standards** with Azure DevOps, automated quality gates, and security scanning, standardizing delivery practices across 4 development teams
- **Optimized high-volume data processing** through database tuning, indexing strategies, and query optimization, supporting 1M+ daily compliance transactions with consistent sub-second response times
- **Built monitoring infrastructure** using Kubernetes and ELK stack (Elasticsearch, Logstash, Kibana), enabling proactive incident management and reducing system downtime by 40%

Service Desk Analyst Trainee (Intern)
Feb 2021 – May 2021

Wiley Mthree • Remote / Training Program

- **Completed intensive 3-month full-stack training program** covering Linux system administration, SQL database management, Python scripting, and Agile development methodologies across 500+ hours of hands-on training, building foundational skills that directly supported subsequent backend engineering roles
- **Developed expertise in enterprise incident operations** including incident triage procedures, change management workflows, and ITIL service management practices, developing reliability-focused mindset and understanding of production system governance and high availability requirements
- **Analyzed cross-functional banking operations workflows** shadowing regulatory compliance processes (HIPAA, financial regulations) and risk management frameworks across 3+ departments, informing system design decisions in later work on enterprise compliance and regulatory systems

EDUCATION

B.Tech Computer Science & Engineering
SRM Institute of Science and Technology • Chennai • Jun 2021 • First Class Distinction • CGPA 8.56

AISSCE (Class XII) - Science Stream
Cathedral Sr. Secondary School • Lucknow • Apr 2017 • 79.8%

ADDITIONAL QUALIFICATIONS

- **Team Leadership:** Successfully mentored 3 junior engineers to promotion, established coding standards, and led cross-functional collaboration with product and business teams across distributed remote environments
- **AI Integration & Innovation:** Pioneered adoption of AI/LLM APIs, wrapper API patterns, and AI agent orchestration to automate manual workflows, driving technical excellence and competitive advantage in marketing technology
- **Business Impact:** Consistently aligned technical deliverables with business objectives, contributing to 10x user growth, 70% reduction in customer onboarding time, and platform scalability supporting revenue expansion
- **Remote-First Collaboration:** Proven track record of delivering high-quality work in fully remote and hybrid distributed team environments with strong asynchronous communication, technical documentation, and agile development practices
