RESUME SUMMARY

Computer Science graduate with knowledge of Python, AI, Machine Learning, and Data Analysis. Developed projects including AI Complaint Analyzer, Digital Traffic Analyzer, and Smart Parking System. Strong analytical, problem-solving, and technical skills with a passion for building innovative technology solutions and learning new technologies.

PERSONAL DETAILS

Current Location	Lucknow
Date of birth	January 1, 2003
Gender	Male

EDUCATION

Post-Graduation	MCA (Data Analytics) Maharishi University of Information Technology (MUIT), Noida with Score 80%
Graduation	B.C.A. (Computer Applications (General)) Era Medical College, Lucknow with Score 77%
Class XII	Uttar Pradesh with 70% in 2021 Achievements: Top 3 in class, Department topper
Class X	Uttar Pradesh with 74% in 2019
Certification Course	Skilling Academy (June 2026 - Present) Python Essential 1 Python Essential 2

INTERNSHIPS AND PROJECTS

Internships	**Analyze Infotech** (Duration February 2026 - May 2026) i am worked in IT department for software developing and developed many projects with python on Django framework .In this i learned database sqlite and in frontend HTML ,CSS. Skills used - Python,Python And Django Developer,SQLite
Projects	**smart parking system** (Duration March 2026 - May 2026) Developed a Smart Parking System using Python, Machine Learning, and Computer Vision to detect parking space availability, monitor occupancy in real time, and optimize parking management through intelligent automation. Skills used - Python,Dashboard Development,System Design,Problem Solving **AI complaint Analyzer** (Duration March 2026 - April 2026) Built an AI-powered Complaint Analyzer using Python, Machine Learning, and NLP to automatically categorize customer complaints, perform sentiment analysis, and extract key issues, improving complaint management efficiency and decision-making. Skills used - Python Programming Machine Learning Natural Language Processing (NLP) Data Preprocessing & Cleaning Text Classification Sentiment Analysis,Natural Language Processing,Data Processing,Data Cleanup **Digital traffic system** (Duration January 2026 - March 2026) Built a Digital Traffic Analyzer using Python, Computer Vision, and Machine Learning to detect, classify, and count vehicles, analyze traffic density, and provide real-time insights for traffic management and congestion monitoring. Skills used - Python Programming Computer Vision Machine Learning OpenCV Object Detection Data Analysis Real-Time Data Processing Problem Solving Traffic Data Analytics Dashboard Development Data Visualization,Computer Vision,Machine Learning

SKILLS AND ACHIEVEMENTS

Skills	Communication Skills,Computer Operating,Negotiation,Field Work
Language	English (Both)
