	Bitbucket, Git.

WORK EXPERIENCE

ITH Technologies Pvt. Ltd. — Kanpur
Frontend Developer | React & NextJs UI Developer — June/2024 – 24/Dec/2025

- CSS3, and JavaScript ES6, adept at crafting pixel-perfect, responsive designs. Proficient in React, Next.js, Redux, and Contex API for building dynamic user interfaces. Skilled in team management, ensuring high- quality deliverables, and fostering collaboration.
- Designed and implemented dynamic, responsive user interfaces with React, improving user experience across various devices and browsers.
- Built scalable and maintainable Next.js applications, utilizing server-side rendering (SSR) and static site generation (SSG) to deliver optimal performance and SEO benefits.

Bajaj Allianz Life PVT Ltd — Kanpur
Sales Executive:- — April/2022 - March/2024

- Customer Communication: Developed strong skills in engaging and persuading clients effectively.
- Team collaboration: Learned to coordinate and communicate efficiently with teams.
- Sales Techniques: Gained experience in handling objections and closing deals successfully.

PROJECTS

Coinbuck (Next.js, Javascript(ES6), Tailwind CSS, SCSS / CSS Modules, Redux Toolkit, React Bootstrap (Modals, Tooltips), REST APIs, Client-side Routing, Gsap, Framer Motion, Responsive Design)

Coinbuck is a token-based platform featuring token listings, pools, and campaign management. I worked as part of a team to successfully migrate the entire application from Angular to Next.js using JavaScript (ES6+), improving overall performance, scalability, and maintainability.
I developed a fully responsive user interface using Tailwind CSS and SCSS modules, and implemented global state management with Redux Toolkit. Core functionalities such as user profiles, referrals, wallets, and social connections were integrated through REST APIs. Authentication and session handling were managed using cookies and localStorage, with social integrations including Google (YouTube), Discord, Telegram, and Twitter/X.
I also contributed to enhancing the user experience by implementing smooth UI animations, transitions, modals, dropdowns, and responsive navigation across desktop and mobile devices, resulting in a modern and production-ready frontend application.

Renewiest (Next.js, Javascript(ES6), Tailwind CSS, SCSS / CSS Modules, Gsap, Framer Motion, Responsive Design)

Renewist is a wellness and biohacking-focused digital platform designed to improve metabolic health, longevity, and overall well-being through science-backed programs and guided renewal pathways. I contributed to building a modern, responsive, and interactive frontend using Next.js and Tailwind CSS, focusing on performance, scalability, and user engagement. My work included developing dynamic UI components, animated sliders, modal-based user flows, and conversion-driven layouts, along with smooth micro-interactions and animations using Framer Motion to enhance the overall user experience across devices.

TDX, TDeFi, Recruin, Bizthon, Tradedog, IthTech, Tdvc, Infotechhub, X.ac (React, Html, CSS, Js, Bootstrap, Jquery)

Worked on UI updates and new additions across multiple websites including TDX, TDeFi, Recruin, Bizthon, TradeDog, ITH Tech, TD.VC, Infotech Hub, and X.AC.
Implemented and enhanced Dynamic & static interfaces using React, HTML, CSS, JavaScript, Bootstrap, and jQuery, with a focus on responsiveness and layout consistency

Recru.in (HTML, CSS, Javascript(ES6), Tailwind CSS, Jquery, Responsive Design)

Developed the entire frontend website from scratch using HTML, CSS, and Tailwind CSS.
Built a fully responsive static website based directly on Figma designs, ensuring pixel-perfect UI accuracy.
Implemented clean layouts, reusable sections, and mobile-first responsiveness.
Focused on performance, structured styling, and cross-browser compatibility.
