Lucknow, India

- Managed vendor and client reporting for 59 accounts.
- Conducted operational and branding reviews for 134 sites.

KEY PROJECTS

Co-Lending (Axis Bank)

Manipal Fintech Pvt. Ltd. | Role: Business Analyst

- Gathered and documented co-lending business requirements with Axis Bank, covering loan lifecycle, risk sharing, compliance rules, and RBI co-lending guidelines; created BRD & FRD.
- Defined end-to-end loan flow including KYC, credit bureau checks, credit filters, approval, e-sign, disbursement, and collections between platform, lender, and Axis Bank.
- Performed field-level data mapping and validation for Axis Bank APIs (CIF, LAN creation, disbursement, FATCA), ensuring accurate request/response handling.
- Coordinated credit, risk, and compliance rules, including score cut-offs, FOIR, LTV, AML, FATCA, and regulatory disclosures per Axis Bank and RBI policies.
- Coordinated with developers to ensure implementation matched requirements.
- Designed positive and negative test cases to validate correct system behavior and exception handling in co-lending workflows.
- Executed test cases on the QC APK, ensuring modules such as application submission, credit checks, and loan disbursement functioned as expected.
- Identified and reported defects with detailed reproduction steps, severity, and screenshots for development teams.
- Performed retesting and regression testing to ensure system stability after fixes.
- Prepared test execution reports and defect logs, sharing updates with Axis Bank and internal teams for timely resolution.
- Supported UAT and integration testing, validating scenarios and ensuring seamless fund disbursement and lender split execution.
- Enabled post-disbursement servicing and collections, defining bullet repayment logic, part-payment handling, escrow management, and 20:80 co-lender split reconciliation.

Consent Management Portal – FinTech Platform

Manipal Fintech Pvt. Ltd. | Role: Business Analyst

- Designed a centralized Consent Management Portal ensuring regulatory compliance and audit readiness.
- Led AWS Dial integration.
- Prepared BRD/FRD, coordinated API integrations, and defined UAT scenarios.
- Supported release management and production rollout.

E-Scoot Mobile Application (Android & iOS)

E-Scoot Rental Solutions | Role: Business Analyst

- Led end-to-end requirement gathering, documentation, and approvals from CEO & COO.
- Managed external development teams, timelines, and UAT cycles.
- Delivered a scalable, multi-brand EV rental platform.

KOTAK – 17 Critical IT Applications

Ernst & Young LLP | Role: Associate Consultant – Business Analyst

- Worked as PMO, coordinating with different Kotak teams for data and monitoring across 17 critical IT applications.
- Documented information and defined a standardized reporting format for all departments.
- Consolidated, monitored, and analysed data from each department, preparing insights for Kotak management.
- Prepared automated dashboards and reports.

TATA AIA – Financial Disclosure Reporting Automation

Ernst & Young LLP | Role: Associate Consultant – Business Analyst

- Developed and automated 8 financial disclosure reports using BOARD software.
- Created data models, performed data mapping, UAT validation, and user training.
- Improved reporting accuracy and regulatory compliance.
