ARYA JAIN

Software Engineer | Java · Python · REST APIs · AI/ML · DSA
+91-7456919195 | aryajain0496@gmail.com | Noida, India | github.com/AryaJain01 | linkedin.com/in/arya-jain01

SUMMARY

Final-year B.Tech CS student (CGPA 8.58), **selected for Infosys Specialist Programmer (L1)**. Hands-on with REST APIs, Stripe payment-flow integration testing, Docker/GCP deployment, and RAG/NLP systems deployed live on Hugging Face Spaces. Daily DSA practice in Java.

EDUCATION

DIT University, Dehradun — B.Tech in Computer Science 2023 – 2027

- CGPA: 8.58 | Scholarship Recipient | Top 10 in Class
- Class XII – CBSE 90% (Top 3, Gold Medalist) | Class X – CBSE 94%

INTERNSHIP EXPERIENCE

Junior AI Product & Experience Engineer (Intern) — HoplabsAI Solutions Pvt. Ltd. Jun – Jul 2026

Telangana, India (Remote)

- Designed and consumed REST APIs for client-facing features; ran end-to-end integration testing including **Stripe payment flows** and multilingual UI validation.
- Conducted structured UAT (83 test cases) for the BuurtBakHuren e-commerce platform, covering admin panel, checkout, and third-party API dependencies (Modules 4–5).
- Managed GCP deployment for AsianCart: Docker containerization, Artifact Registry configuration, and service startup debugging with AI-assisted tooling.
- Produced stakeholder documentation covering platform architecture, role-based flows, REST API specs (16 routes), and QA observations.

PROJECTS

AI-Powered Legal Document Analyzer 2026

- Built an end-to-end **RAG pipeline** (LangChain LCEL, FAISS, Sentence Transformers) for context-aware Q&A over uploaded legal PDFs.
- Trained a clause risk classifier on the CUAD dataset (41 clause types); deployed live on Hugging Face Spaces with a Streamlit UI and multi-document semantic retrieval.

AI Mental Health Screening — Virtual Check-In 2026

- Architected a dual-pipeline multimodal triage system combining fine-tuned RoBERTa NLP with librosa acoustic analysis; fully offline, privacy-first inference (.safetensors weights).
- Designed a 40/60 hybrid scoring algorithm optimized for **Recall** to minimize false negatives in a healthcare-adjacent context.

SKILLS

Languages: Java (primary, DSA), Python, SQL, JavaScript (familiar)
DSA: Arrays, Linked Lists, Trees, Graphs, DP, Backtracking, Binary Search, Sliding Window
Web & APIs: REST API design/consumption, React (familiar), Git, GitHub
Databases: SQL, relational databases, FAISS (vector store)
AI / ML: Scikit-learn, Hugging Face Transformers, LangChain (LCEL), LangGraph, RAG, CrewAI, Groq, Streamlit
DevOps & Cloud: Docker, GCP (Artifact Registry, Cloud Run), GitHub Actions, Hugging Face Spaces
Testing & QA: UAT, integration testing, test case design, REST API validation

ACHIEVEMENTS

- **Selected for Infosys Specialist Programmer (L1).**
- Scholarship Recipient at DIT University for academic excellence (Top 10 in class).
- Gold Medalist in Class XII (Top 3, 90% CBSE); Head Boy of the school (2022–23).
- Active LeetCode practitioner: daily DSA in Java across Backtracking, Sliding Window, and Dynamic Programming.

CERTIFICATIONS

- Machine Learning Specialization (Coursera) | Deep Learning Specialization (Coursera)
- LangGraph (LangChain) | Data Science Bootcamp – Krish Naik | Full-Stack Web Dev – Angela Yu (Udemy)
