Professional Summary

PHP Laravel Developer with 4+ years of hands-on experience designing, developing, and maintaining scalable web applications using PHP and the Laravel Framework. Skilled in building secure, high-performance, and RESTful web applications following MVC architecture and modern software development best practices. Experienced in developing REST APIs, authentication and authorization, database design, CRUD operations, payment gateway integration, and third-party API integrations. Proficient in PHP, Laravel, MySQL, HTML5, CSS3, JavaScript, Bootstrap, jQuery, Git, Composer, and RESTful APIs. Familiar with version control, Agile methodologies, and deployment on Linux servers. Strong understanding of application security, performance optimization, debugging, and writing clean, maintainable, and reusable code to deliver reliable business applications.

Technical Skills & Tools

- **Programming Languages**: PHP, JavaScript, HTML5, CSS3, SQL
- **Frameworks**: Laravel, Bootstrap, jQuery
- **Database**: MySQL
- **Authentication & Security**: Laravel Authentication, Laravel Sanctum/Passport, Role-Based Access Control (RBAC), Form Validation, CSRF Protection
- **Version Control**: Git, GitHub
- **Development Tools**: Composer, Postman, VS Code, XAMPP, Laragon
- **Deployment & Hosting:** cPanel
- **API Integration**: Third-Party APIs, Payment Gateway Integration, Email (SMTP), SMS APIs

Work Experience

Softzix Private Limited, Odisha | Laravel Developer | August 2025 – Present

- Developed, maintained, and enhanced **B2B and B2C fintech web applications** using **PHP, Laravel, MySQL, HTML, CSS, JavaScript, Bootstrap, and jQuery**.
- Designed and developed secure **RESTful APIs** for seamless communication between web applications and third-party services.
- Integrated multiple fintech APIs, including **AEPS (Aadhaar Enabled Payment System), BBPS (Bharat Bill Payment System), DMT (Domestic Money Transfer), UPI, Payment Gateway, Mobile & DTH Recharge, Fastag Recharge, and Utility Bill Payment APIs**.
- Developed and maintained **wallet management**, user balance, transaction history, commission management, and settlement modules for retailers, distributors, and administrators.
- Implemented **beneficiary management, fund transfers, transaction status tracking, callback/webhook processing, and reconciliation** to ensure accurate financial transactions.
- Built client-specific modules and customized business logic based on project requirements while ensuring application security and performance.
- Optimized **MySQL** database queries, Eloquent ORM operations, and application performance to improve response time and scalability.
- Implemented authentication, authorization, input validation, secure API communication, and comprehensive error handling for financial services.
- Performed application testing, debugging, bug fixing, and code optimization to ensure reliable and uninterrupted system functionality.
- Deployed and maintained Laravel applications on **cPanel** servers, managed application configurations, and monitored production issues for timely resolution.

- process improvements to ensure stable and reliable application delivery.

Part-Time PHP Laravel Trainer | Independent Training & Mentorship | 2025-2026

- Delivered part-time training on **PHP, Laravel, MySQL, HTML, CSS, JavaScript, Bootstrap, and Git** to students and aspiring web developers through practical, project-based learning.
- Designed and conducted hands-on sessions covering **Laravel MVC Architecture, CRUD Operations, Authentication, RESTful APIs, Database Design, Eloquent ORM, Blade Templating, and Application Deployment**.
- Mentored learners in developing real-world web applications, debugging code, following coding standards, and adopting software development best practices.
- Assisted students with project implementation, interview preparation, problem-solving, and understanding industry-relevant development workflows.
- Continuously enhanced technical expertise by working on personal Laravel projects and staying up to date with modern PHP and Laravel features.

SWA Softech Pvt. Ltd. |Web Developer | March 2025 – August 2025

- Developed and maintained an **MLM web application** using PHP, Laravel, MySQL, JavaScript, HTML, CSS, and Bootstrap.
- Worked on **member registration, referral hierarchy, plans, commissions, income distribution, transactions, and reporting modules**.
- Implemented **MVC architecture, Eloquent ORM, authentication, role-based access, CRUD operations, and RESTful APIs**.
- Developed **admin and user dashboards** with business-specific MLM functionalities.
- Optimized database queries, fixed bugs, performed testing, and implemented new features based on project requirements.
- Worked with **Laravel Cron Jobs and Scheduled Tasks** to automate recurring processes such as data updates, notifications, reports, and subscription/plan-related operations.

TechSoch | Laravel Developer | October 2024- February 2025

- Developed, maintained, and enhanced scalable web applications using **PHP, Laravel, MySQL, HTML, CSS, JavaScript, Bootstrap, and jQuery**.
- Worked on the **Car-Action project**, contributing to the development and maintenance of business modules, application workflows, and backend functionality.
- Designed and developed **RESTful APIs** to enable seamless communication between the web application, mobile/client applications
- Implemented and maintained **database-driven modules** using Laravel Eloquent ORM, Query Builder, migrations, relationships, and optimized MySQL queries.
- Developed **user management, authentication, authorization, and role-based access control** according to project requirements.
- Built and customized **admin panel functionality**, including CRUD operations, data management, reporting, search, filtering, and status-based workflows.
- Implemented dynamic business logic and customized features based on **client-specific requirements and project specifications**.
- Collaborated with team members to understand requirements, resolve technical issues, and deliver features within defined timelines.

Octanics | Laravel Developer | December 2021 – May 2024

- Developed and maintained RESTful APIs using PHP, Laravel, and Lumen based on project and business requirements.
- Designed and implemented API endpoints for CRUD operations, data processing, authentication, validation, and business logic.
- Developed backend functionality using Laravel/Lumen Controllers, Models, Eloquent ORM, Query Builder, Middleware, and MySQL.
- Created and optimized MySQL queries and database operations to ensure efficient API performance and reliable data handling.
- Integrated the developed Laravel/Lumen APIs with Angular applications, handling API requests, responses, data

binding, and frontend-backend communication.
- Worked with Angular developers to troubleshoot API integration issues, request/response mismatches, validation errors, and data-related issues.
- Implemented proper API validation, exception handling, HTTP status codes, and JSON responses for reliable frontend integration.
- Worked on API debugging and testing using tools such as Postman to verify request parameters, responses, authentication, and error scenarios.
- Integrated and consumed third-party APIs wherever required and handled their requests, responses, authentication, and error handling.
- Optimized backend code and database queries to improve API response time and application performance.
- Performed debugging, bug fixing, testing, and code optimization for Laravel/Lumen APIs and their Angular integrations.
- Collaborated with the development team to understand requirements and deliver API-based features and integrations within project timelines.

Projects

TurboBusiness | December 2021 – May 2024

Project: Business Management ERP System | **Role:** Senior Software Developer
Environment: PHP, Laravel, Angular, MySQL

- Developed and maintained a comprehensive **Business Management ERP System** for managing **employees, customers, sales, laundry operations, inventory, and POS (Point of Sale)** billing processes.
- Designed and implemented client-specific features and business modules based on functional requirements using **Laravel, Angular, and MySQL**.
- Developed and integrated secure **RESTful APIs** to enable seamless communication between frontend applications and backend services.
- Built and enhanced modules for **Employee Management, Sales Management, Customer Management, Laundry Management, Inventory Management, and POS Billing**.
- Optimized MySQL database queries, application logic, and API performance to improve response time and overall system efficiency.
- Performed code reviews, debugging, and application testing to ensure high code quality, maintainability, and adherence to development standards.
- Fixed application defects, resolved production issues, and implemented performance improvements based on client feedback.
- Collaborated with cross-functional teams to analyze business requirements, deliver new features, and ensure timely project delivery using Agile methodologies.
- Managed application deployments on Linux/cPanel servers and provided post-deployment support to ensure application stability and availability.
- Participated in requirement analysis, feature enhancements, production releases, and ongoing maintenance to ensure continuous improvement of the ERP platform.

Project - Shinchuo | Car Auction & Sales Platform

Role: Laravel Developer
Environment: PHP, Laravel, MySQL

- Developed and enhanced a car auction and sales platform enabling users to bid on vehicles, participate in live auctions, and complete the purchase-to-delivery process.

- Implemented client-specific features and business logic based on functional requirements using Laravel and MySQL.

- Developed, maintained, and optimized RESTful APIs for auction management, bidding, vehicle listings, user management, and order processing.

- Integrated secure authentication, input validation, and error handling to ensure reliable application performance.
- Optimized database queries and application performance to improve response time and scalability.
- Performed debugging, issue resolution, and feature enhancements while providing production support and maintenance.
- Collaborated with the development team to deliver new features, fix bugs, and ensure timely project releases.

Project: Society Development | Apartment Management System

Role: Laravel Developer
Environment: PHP, Laravel, MySQL

- Designed and developed a Society Management System from scratch using Laravel and MySQL to manage apartment owners, flats, maintenance records, and billing operations.
- Developed complete backend architecture, database schema, and application modules following Laravel best practices.
- Built secure RESTful APIs for owner management, flat details, invoice generation, payment records, and administrative operations.
- Implemented modules for resident management, maintenance billing, invoice generation, payment tracking, and report management.
- Performed application testing, debugging, and code optimization to ensure system reliability and maintainability.
- Optimized database performance and application workflows for efficient data processing and faster response times.
- Participated in requirement analysis, feature implementation, deployment, and ongoing application maintenance.

Academic Credentials

- **Bachelor of Computer Applications (BCA)** — Pursuing, **Manipal University Jaipur (MUJ)**
- **Diploma** in **Information Technology (IT) with 80%** (GGP, Gorakhpur | 2020)
- **12th in PCM from RLIC Ballia with 84% in 2017**
- **10th from RLIC Ballia with 86% in 2015**
- **Pursuing BCA from MUJ**
